To THE HON. N. E. TANNER,  
Minister of Lands and Mines.

Sir:

I herewith submit the Report of the Mines Branch for the year ending  
December 31st, 1937.

Respectfully submitted,

A. A. MILLAR,  
Chief Inspector of Mines.

ANNUAL REPORT OF THE MINES BRANCH FOR THE YEAR  
ENDING DECEMBER 31st, 1937.

(ANDREW A. MILLAR, Chief Inspector.)

The output of coal produced from mines in the Province during the year was 5,551,682 tons, with a valuation of \$14,434,969.75, being a decrease of 144,693 tons from the output of 1936.

In addition to the above tonnage, there were 1,883 tons produced by farmers under permit, for their own use, which tonnage has not been included in the total output. There has also been a considerable tonnage produced by farmers without either permit or lease; of this tonnage we have no record.

The disposition of coal during the year was as follows: 1,326,054 tons sold for consumption in the Province of Alberta; 1,855,392 tons sold for consumption in other Provinces of Canada; 41,328 tons sold for consumption in the United States; 2,028,389 tons to railroad companies for locomotive use; 25,402 tons used making briquettes; 99,537 tons used making coke; 145,967 tons used under colliery boilers; 6,022 tons used by colliery railroads; 48,501 tons put to stock; 35,797 tons put to waste. The above tonnages include coal lifted from stock and waste heaps, which is not included in the total output.

The coal produced by farmers under permits is not included in the total output, neither are the particulars as to men and shifts producing such coal included in any tables,—this information being given in a separate table, this being done in order that there should be no confusion of the regular statistics.

There were 303 mines in operation during the year, of which 27 were opened, 16 re-opened, and 37 abandoned. In addition to the mines abandoned there were 10 mines temporarily closed, leaving 275 mines in operation as at December 31st, 1937.

There were 484 persons examined during the year for certificates of competency as coal miners, of whom 425 were successful, making a total of 14,735 certificates issued to coal miners as at December 31st, 1937.

During the year the following changes took place in the staff of the Mines Branch: Mr. A. B. Hunter was moved from Drumheller to Camrose, replacing Mr. B. Nugent, who left the service, and Mr. J. Crawford was appointed to fill the vacancy, being stationed at Drumheller. Mr. J. B. deHart resigned and Mr. W. E. G. Hall was transferred from Blairmore to Lethbridge, Mr. D. B. Young being appointed to fill the vacancy, with headquarters at Blairmore.

In addition to the above changes the mines in the Pincher area were transferred from Mr. W. G. Heeley, Calgary, to Mr. D. B. Young at Blairmore, and the mines in the Carbon area were transferred from Mr. A. B. Hunter, Camrose, to Mr. W. G. Heeley, New Court House Building, Calgary.

Samples of mine air were taken at several mines during the year by the Inspectors, the samples being forwarded to the Chemistry Branch of the

Department of Mines, Ottawa, for analysis, this being done in addition to testing air with the Burrell & McLuckie gas detectors, also the M-S-A Model W-8 Methane Detector was used in several mines for checking up on low percentages of methane in the mine atmosphere. In addition to using the above detectors, some of the mines are using the Ringrose Automatic Fire Damp Alarm.

Samples of rock-dust, used for rock dusting the roadways in the bituminous mines, have been collected at intervals and forwarded to the Provincial Analyst to be tested for silica content.

Samples of coal have been collected and forwarded to the Industrial Research Department, University of Alberta, for analysis.

All fatal and serious accidents have been investigated by the Inspectors, who also attended the inquests in their areas, this being in addition to the regular inspection of mines.

The total number of fatal accidents were 20, as compared with 11 in 1936.

There were 26 prosecutions instituted under The Coal-mines Regulation Act, of which 1 was an operator, 3 officials, 14 miners, 1 driver, 3 machine runners, and 4 farmers, the latter four cases were withdrawn.

There were 25,483,749 K.W.Hrs. of purchased electrical power used by the mines in the Province during the year, the distribution of purchased power used by mines in the various areas being as follows: Big Valley, 10,480 K.W.Hrs. being purchased from the Union Power Company, Limited, of Drumheller, who also supplied 174,110 K.W. Hrs. to mines in Carbon and 4,470,508 K. W. Hrs. to mines in the Drumheller Area. Calgary Power Company, Limited, supplied electrical power to mines in areas as follows: Camrose, 6,970 K.W. Hrs., Gleichen, 1,106 K.W. Hrs., Lethbridge, 2,051,457 K.W. Hrs., Taber, 8,000 K.W. Hrs., and, Edmonton, 514,760 K.W. Hrs. The City of Edmonton also supplied 947,093 K.W. Hrs. to mines in the Edmonton Area. The East Kootenay Power Company, Limited, supplied 17,190,965 K.W. Hrs. of electrical power to mines in the Crowsnest Area. The City of Medicine Hat supplied 54,000 K.W. Hrs. to mines in the Redcliff Area. Two mines in the Coalspur Area exchanged 54,300 K.W. Hrs. of electrical power, this being in addition to the power used and generated at each mine.

There were 9,356 men employed in mines during the month of December, being a decrease of 600 men from the corresponding month in 1936.

On April 4th, fire destroyed the entire surface plant and tippie at the Atlas Mine operated by the Regal Coal Company, Limited, at East Coulee. Same have since been rebuilt.

On August 3rd, fire destroyed the tippie at the Premier Mine operated by the Edina Coal Company, Limited, in Edmonton.

On November 2nd, fire destroyed the engine house and the wash house at the mine operated by the Kleenbirn Collieries, Limited, at Kleenbirn.

On November 2nd, fire broke out in the underground stable at the mine operated by the Hy-Grade Coal Company, Limited, at Drumheller, which destroyed 32 ponies.

On November 6th, fire was discovered at the face of No. 21 Room, No. 1 East Level, in the mine operated by the McLeod River Hard Coal Company, Limited, at Mercoal, the location being in the old workings near the outcrop. This was isolated from the rest of the workings by means of stoppings.

On December 30th, fire destroyed the wash house of the A. B. C. Mine, operated by the Alberta Block Coal Company, Limited, at Drumheller.

There have been some changes in operations during the year. The Premier Mine, operated by the Edina Coal Company, Limited, at Edmonton, was abandoned.

The Western Gem Mine, operated by the Western Gem and Jewel Collieries, Limited, at Drumheller, was also abandoned.

The Kent and the Banner Mines in the Edmonton area have both installed longwall system of mining using face conveyors; the Banner Mine is now operating in the lower seam. This system of working has also been adopted by the Cambrian Mine, operated by the Western Gem and Jewel Collieries, Limited, near Wayne.

A new tippie was erected at the Ellerslie Collieries, near Edmonton, with capacity from 150 to 200 tons a day.

A new slope was sunk and a new tippie erected at the Samis Collieries near Namao in the Edmonton area.

Ignitions of gas occurred in the Edmonton area with open lights and one from sparking of electrical apparatus. As the result of the latter one man was killed and three seriously injured. Three additional mines have installed electric cap lamps.

A Vissac wet-washer was installed and put into operation at the mine operated by the Brazeau Collieries, Limited, at Nordegg.

The Calgary Power Company, Limited, has constructed a transmission line to supply power to the mines in the Nordegg and Saunders areas.

A 250- H.P. Motor replacing one of 125 H.P., doubling the hoisting speed in the shaft, was installed at the Standard Mine operated by the Lethbridge Collieries Limited at Shaughnessy.

Spiral cleaners for the preparation of stoker coal have been installed at both the Standard and the Galt Mines, operated by the Lethbridge Collieries, Limited.

The Mohawk Bituminous Mines, Limited, Bellevue, have installed a new hoist on the surface, which is used for lowering coal from the workings to the tippie level. It is equipped with a 350 H.P., 2,300 Volt motor with power brakes and power clutch. The ropes used are 1¼" in diameter and 7,000 feet in length.

At the Bellevue Mine, operated by the West Canadian Collieries, Limited, two new Y air cleaning tables and two Vissac jigs were installed. The air cleaning tables handle the smaller sizes (0 to ¾-inch) and the Vissac jigs handle from ¾ to 3-inch coal.

At the Greenhill Mine, operated by the West Canadian Collieries, Limited, 3,000 feet of steel supports were completed.

Considerable rock work has been done at the mine operated by the International Coal and Coke Company, Limited, at Coleman. The crosspitch slope from "C" level has been completed through to the surface and connected to "A", "B", and "C" levels. The old hoist has been moved to the new site and is housed in a brick building 42 by 36 feet. The rock tunnel in "A" level has been driven a distance of 2,100 feet. A new pump house was completed in "D" level north. It is 14 by 32 feet, built of concrete with steel supports housing two 5-stage centrifugal pumps.

Cadomin Coal Company, Limited, at Cadomin, has constructed a new fireproof building of structural steel with brick and concrete, used as wash house and lamp house, the floors in the wash house and lamp house are of concrete. A general office of semi-fireproof construction has also been erected. An Aerodyne fan has been installed at the Shaft Mine with Trane radiators for pre-heating of mine air in cold weather. A double cylinder 26 by 60-inch hoist engine has been installed at the shaft, and a steel head frame has been constructed and is ready to be moved forward over the hoisting shaft. A 750 K.W. Curtis turbine generator has been installed in the power house, and new H-frame steel towers carrying 2,300-volt power line from the main power house to the shafts have been erected.

At the mine operated by the Luscar Coals, Limited, at Luscar, the rock slope has been extended to a further distance of 1,200 feet.

At the mine operated by the Mountain Park Coals, Limited, at Mountain Park, the rock tunnel from the Michelin to the Kennedy seam has been completed. They installed a 150 H.P. Motor for the purpose of providing power for charging batteries for storage battery locomotives.

At the mine operated by the Hinton Collieries, Limited, at Hinton, electric cap lamps were installed. An electrically operated coal cutter of the shortwall type was also installed with the necessary transformers and transmission cables. Two conveyors operated by compressed air and an air compressor also were installed.

In the Toronto office, Mr. E. S. Clarry continued the efforts to extend the sales of Alberta coals in the Ontario market.

\*The sum of Canadian coal-mine sales, colliery consumption, coal supplied to employees, and coal used in making coke, etc., less the tonnage of coal exported.

†Includes small tonnages from countries other than Great Britain and the United States. Deductions have been made to take account of foreign coal re-exported from Canada and bituminous coal ex-warehoused for ships' stores.

The following Table shows the quantity of coke imported into Canada during the years 1935, 1936, and 1937, through ports in the Provinces, compiled from information received from the Dominion Bureau of Statistics.

NOTE: The table showing the number of men employed in the Anthracite Coal Field includes employees at the briquetting plant. There has been no anthracite coal produced since 1923.

During the year 1909, a strike, affecting all the larger mines in the Province, lasted for a period of three months.

During the year 1911, a strike, affecting all the larger mines in the Province, lasted for a period of eight months.

During the year 1917, a strike, affecting all the larger mines in the Province, lasted for a period of three months.

During the year 1919, a strike, affecting all the larger mines in the Province, lasted for a period of three months.

During the year 1922, a strike, affecting all the larger mines in the Province, lasted for a period of five months.

During the year 1924, a strike, affecting all the larger mines in the Province, lasted for a period of six and one-half months.

NOTE: \*Calculating the total per capita production for men employed underground, the tonnage mined from stripping pits was deducted and only the tonnage produced from mines was used.

It will also be noted that the tonnage used in the above and following tables does not include tonnage extracted under permit.

## ELECTRICITY

The rules for the installation and use of electricity in or about mines require a return to be made to the Department on or about January 15th of each year, giving size, type and any other particulars which may be required of electrical apparatus in use above and below ground. According to the returns received from the different mines, electricity was used in 80 different mines in 1937. A summary of these returns regarding the horse-power of electrical apparatus in use is given below:

## FATAL ACCIDENTS

William Babby, driver, age 34 years, on January 13th, in the mine operated by the Rosedale Collieries Limited at Aerial near Rosedale, caused through his falling in front of a trip of loaded mine cars. He was driving a horse hauling a trip of loaded mine cars on the main entry, in the Star Mine, and slipped whilst endeavoring to hold back the trip, causing the first car to become derailed jamming him against a prop. Fractured pelvis, ruptured bowel also heart displaced from the effects of which he died 30 hours later.

John Swan, overman, age 70 years, on January 14th, in the mine operated by Klapstein and Opalinski at White Mud Creek near Edmonton caused through his falling off the skip in the shaft. He had been inspecting the workings prior to the shift commencing work, and was being hoisted to the surface riding on the skip. Apparently the guide wheel got out of track causing the skip to turn over throwing him to the shaft bottom. He was dead when recovered, death being caused through a broken neck.

E. Canoot, miner, age 59 years, on January 20th, in the mine operated by the Jewel Collieries Limited at Wayne caused through a fall of coal and bone at the face of a room. He was loading coal at the face of 51 room, 6 W. Entry when a piece of overhanging bone and coal fell from the face partially burying him. Fractured pelvis and left wrist also internal injuries from the effects of which he died about 16 hours later.

Wasyla Dmytruk, driver, age 35 years, on January 26th, in the mine operated by the Empire Collieries Limited at East Coulee caused through his falling in front of a trip of loaded cars. He was driving a horse hauling a trip of loaded cars when his light went out and in trying to stop the cars tripped and fell under the first car. Left leg broken and internal injuries from the effects of which he died 4½ hours later.

Mike Betchuk, cager, age 22 years, on February 19th, in the mine operated by the Kelstar Coals Limited at Carbondale near Namao caused through his being struck by a loaded mine car. He was working in the sump at the shaft bottom, lower seam, having signalled to the hoisting man to this effect. The cage had been hoisted 10 feet above the bottom when a loaded mine car that had been brought to the shaft by a miner moved forward and dropped onto him in the sump. When found his head was under water, being held there by the car, and he was dead. Death being caused by drowning.

Emil Checknito, miner, age 42 years, on February 20th, in the mine operated by the Kelstar Coals Limited at Carbondale near Namao, caused through an ignition of methane. He, along with other men, was working in the lower seam when an explosion of methane occurred from the electrically operated coal cutting machine. Checknito, who was at the shaft bottom, was thrown against a car causing a fractured skull and internal injuries from the effects of which he died in the hospital next day. The other men were burned and bruised.

John Mansell, miner, age 59 years, on February 25th, in the mine operated by the Hillcrest Collieries Limited at Hillcrest, caused through a fall of rock at face of a room. He was working at the face of No. 15 cross-pitch when a large piece of rock fell from the roof dropping on top of him. Fracture at base of skull also both bones of right leg fractured above the ankle, right arm severed at elbow and internal injuries causing instant death.

Herman Loxley, miner, age 35 years, on March 4th, in the mine operated by the McLeod River Hard Coal Company Limited at Mercoal, caused through a fall of rock and coal at the face of a room. He, along with his partner, was working at the face of No. 9 room, No. 3 East Entry. He was shovelling coal into the chute when a piece of rock and roof coal fell striking him. Fractured jaw, ribs and right humerus, dislocated hip, cut face and punctured lung from the effects of which he died 3 hours later.

Alexander McLaren, miner, age 36 years, on March 13th, in the mine operated by the Canadian Dinant Coal Company Limited at Dinant, caused through a fall of rock in pillar workings. He had gone to work in No. 17 room when shortly after his arrival there the timbers broke causing a cave which buried him. He was dead when taken out, death being caused by suffocation.

George Stocks (Grigori Stacevich), miner, age 46 years, on April 28th, in the mine operated by the Cadomin Coal Company Limited at Cadomin, caused through a fall of coal. He, along with his partner, was retimbering No. 5 Main Angle in No. 7 Panel, at a fault when a fall of coal occurred which buried him. He was dead when taken out, death being caused by suffocation.

John Price, Sr., examiner, age 60 years, on May 20th, in the mine operated by the Mountain Park Coals Limited at Mountain Park, caused through his being struck by a timber which slipped down a chute. He was walking on No. 1 East Entry, Kennedy Seam, when whilst passing No. 28 chute was struck on the head by a prop which had slipped down the chute from the face. Fractured skull resulting in death one hour later.

Fred Golding, chute loader, age 20 years, on June 10th, in the mine operated by McGillivray Creek Coal and Coke Company Limited near Coleman, caused through his falling into a chute. He was loading coal into cars from No. 64 chute. He had gone up to start the coal running down the chute when, in some unknown manner, he fell into the chute and was buried by the coal. He was dead when taken out, death being caused by suffocation.

Joseph H. Bosely, examiner, age 37 years, on July 2nd, at the mine operated by the Mohawk Bituminous Mines Limited near Bellevue, caused through a premature explosion of detonators. He had been firing shots in rock in the construction of a road on the surface to the new hoist house. It was the end of the shift and he was carrying an undetermined number of detonators which in some unknown manner exploded killing him instantly.

Jacob Simla, miner, age 52 years, on July 21st, in the mine operated by the International Coal and Coke Company Limited at Coleman, caused through a fall of rock in pillar workings. He was digging a hole in the floor preparing to put up a prop when a large piece of rock fell from the roof onto his back. Back and chest injured also possible internal injuries. He was dead when taken from under the rock.

B. Kanashiro, labourer, age 32 years, on July 29th, at the No. 8 Mine operated by the Lethbridge Collieries Limited near Lethbridge, caused through his being struck by a block which kicked out from in front of a car wheel. He was changing a R. R. car under the loading chute when the block, he was placing in front of the wheels, kicked out striking him in the abdomen and knocking him down. He suffered abdominal injuries and fractured skull from the effects of which he died on August 3rd, 1937.

John Gleghorn, miner, age 58 years, on September 17th, in the mine operated by the Wayne Coal Producers Association Limited at Wayne, caused through a fall of rock at the face of a room. He, along with his partner, was working at the face of No. 13 room, No. 4 South Entry, taking down some small pieces of rock when a large piece of rock fell from the roof onto his head and shoulders knocking him down. Fractured skull and ribs with extensive abrasions to back and haemorrhage which caused death one hour later.

Fred Anderson, miner, age 30 years, on November 5th, in the mine operated by the West Canadian Collieries Limited at Blairmore, caused through a fall of coal. He was shovelling coal in No. 12½ Crosscut, No. 43½ Pillar, No. 3 Level when a fall of coal occurred burying him. He was dead when taken out death being caused by a fractured neck.

William Shershyn, miner, age 45 years, on November 17th, in the mine operated by the Foothills Collieries Limited at Foothills, caused through a fall of coal. He had drilled a shothole in a large piece of overhanging top coal and apparently was undermining when the coal fell onto him, knocking him down. Compound fracture left upper arm and right leg, also crushed chest and possible skull fracture. He died whilst being taken to the surface.

Mike Hazuka, coke oven watchman, age 69 years, on November 21st, at the mine operated by the International Coal and Coke Company Limited at Coleman, caused through being struck by the coke oven lorry. He had gone up on top of the coke ovens and was looking for a hammer, sitting in the center of the track when the oven lorry came along knocking him down and passing over him. Compound fracture of both legs, the shock causing death about five hours later.

Louis Giacomuzzi, miner, age 53 years, on December 3rd, in the mine operated by the Western Gem and Jewel Collieries Limited at Wayne, caused through a fall of rock. He was working at the face of No. 13 Room No. 3 West Entry apparently endeavoring to take down some cap rock when he slipped and fell under the rock which dropped on top of his head. Head crushed causing instant death.
